From there, we see that all males with the 1,3 genotype are affected - don't get distracted by the 1,3 female! Since the question is asking for an unaffected male, the answer can't be 1.. About 80% through with UWorld (currently at 58%) and will be done by Friday (doing 120 questions/day).. However, after going through all of the questions (and seeing all of my dumb mistakes), I realized that my percent correct was 73%, which, while not stellar, seems like it..
